

INDATECH CONSULTING SERVICES

Indatech's Mission is to provide visionary leadership in the use of insurance data and technology to help their clients identify new opportunities to improve efficiencies, increase profitability and expand market reach.

Through 30 years of wide-ranging industry experience, Indatech provides a crucial link between business and technology for any insurance organization. We provide on-demand short-term or long-term assistance to lead, support or review your projects relating to:

- Predictive Analytics strategy
- Marketing research
- Digital and AI strategy review
- Evaluation and selection of new or existing technology
- Business Intelligence strategy
- Risk Management support (Data Management Strategy)
- Reconciliation of financial and statistical systems
- Actuarial data preparation for pricing and reserving
- IBC data reporting
- Data integration projects
- KPI and Management Reports
- Business Development services
- Interim operations management services

Contact us to discuss your specific needs.
